

Marketing Campaign Performance Analysis

A comprehensive Power BI dashboard evaluating **1,000 campaigns** across 8 types and 6 regions — measuring ROI, funnel efficiency, and where marketing budget delivers the most value.

POWER BI

DAX MEASURES

FUNNEL ANALYSIS

ROI INTELLIGENCE

Project at a Glance

Three datasets were unified into a **star schema model** to power an interactive dashboard tracking campaign effectiveness, funnel performance, and regional ROI.

1,000

Campaigns Analyzed

Across 8 types and 6 regions

\$42.5M

Total Revenue

Generated across all campaigns

68%

Average ROI

Return on \$25.69M total spend

126

Campaigns at a Loss

12.6% flagged for monitoring

Data Foundation

Three CSV Datasets Unified

Data was cleaned and structured using a **star schema model** with DAX measures for Total Spend, Revenue, ROI, Conversion Rate, and Profit/Loss.

Campaign Details

Campaign type, average spend, average ROI, total campaigns run per type

Campaign Performance

1,000 records: spend, impressions, clicks, conversions, revenue, ROI

Region Performance

Spend, revenue, and average ROI aggregated by region

Marketing Funnel: Where Value Is Lost

The Primary Bottleneck

The steepest drop-off occurs at the **impression-to-click stage** — only 2.04% of impressions convert to clicks. This signals that **ad creative and targeting** — not the post-click experience — is the biggest lever for improvement.

503M → 10M
2.04% CTR

10M → 1M
10.18% CVR

Top-Performing Campaign Types

☐ Influencer Marketing

ROI Contribution: 137.35

Highest total ROI contribution across all campaign types — outperforms every digital and traditional channel.

☐ Social Media Ads

ROI Contribution: 87.95

Strong second-place performer, driving consistent returns across audience segments.

☐ Search Engine Ads

ROI Contribution: 87.77

Nearly tied with Social Media, confirming paid search as a reliable performance channel.

Digital vs. Traditional: Channel Mix

Digital Dominates the Mix

65.5% of all campaigns (655 of 1,000) were digital, reflecting a clear strategic shift toward measurable, scalable channels. Traditional campaigns accounted for the remaining 34.5%.

- Digital's majority share aligns with its stronger ROI performance — particularly Influencer, Social Media, and Search channels.

Regional Performance: Africa Leads on Efficiency

Full regional breakdown available in the Power BI dashboard.

Africa: The Efficiency Standout

Africa generated the **highest regional revenue at \$8.6M** despite only \$5.1M in spend — a stronger return ratio than higher-spend regions like North America. This suggests Africa's marketing budget is working harder — a strong case for **increased investment** in this region.

\$8.6M Revenue

Top among all 6 regions

\$5.1M Spend

Mid-range investment, high output

Campaigns Running at a Loss

12.6% of Campaigns Flagged

126 of 1,000 campaigns ran at a net loss. These were isolated in a dedicated gauge visual for quick executive monitoring against an acceptable loss threshold. Isolating underperformers enables faster reallocation of budget toward higher-ROI channels and campaign types.

874 Campaigns

Performing at or above break-even (87.4%)

126 Campaigns

Flagged for review and optimization (12.6%)

Dashboard Features & Capabilities

KPI Cards

Best Campaign, Average ROI, Total Revenue, Total Spend, Conversion Rate, and Total Impressions — at a glance.

Marketing Funnel

Impressions → Clicks → Conversions with stage-by-stage drop-off percentages visualized.

Channel Contribution

Digital vs. Traditional campaign split (65.5% vs. 34.5%) in a clear pie chart.

Regional & Campaign Charts

Spend vs. Revenue by region; ROI ranking by campaign type with interactive filtering.

Spend vs. ROI Trend

Line/area chart tracking campaign spend against ROI over time to spot efficiency patterns.

Loss Gauge

Real-time monitoring of campaigns running at a loss against a defined acceptable threshold.

Key Takeaways & Business Value

1 Invest in Influencer Marketing

With the highest ROI contribution (137.35), Influencer Marketing outperforms all other channels — a clear case for budget prioritization.

2 Fix the Top of Funnel First

The 2.04% CTR is the biggest bottleneck. Improving ad creative and targeting will unlock more value than optimizing the post-click experience.

3 Scale Africa's Budget

Africa delivers the strongest revenue-to-spend ratio. Increasing investment there could yield outsized returns vs. higher-spend, lower-efficiency regions.

4 Monitor & Eliminate Losses

The 126 loss-running campaigns represent recoverable budget. Regular gauge monitoring enables faster reallocation to winning channels.
